

## Map Search

1. Select Search and Map Search
2. To begin, modify your radius search to "1" mile. Then enter the address, city & zip code of your subject property into the appropriate fields. The proximity search criteria will allow you to narrow your search results to listings located within a one (1) mile radius of your subject property. *Note: This may be a better alternative for you to use rather than using the map coordinate (i.e. map letter and map number) or subdivision description fields.*

Proximity Search			
Radius	<input type="text" value="1"/>	miles	
Address	<input type="text" value="30021 Rosslyn"/>		
City	<input type="text" value="Garden City"/>		
State	<input type="text" value="MI"/>	Zip	<input type="text" value="48135"/>
<input type="button" value="Find"/>			

3. Click the **Find** button. Realcomp's Solid Earth mapping interface should appear with your subject property plotted on the map.

4. Scroll down the screen until you see the **Accept Search Area** option. Click this button.

Proximity Type:  Radius  Polygon  Driving Distance

Please specify the radius in miles around the target address.  Search Radius

Once you are satisfied with the search area, click here to return to your search.

5. Enter the criteria for your search (i.e. status, minimum search price, additional fields such as minimum bedrooms, minimum baths, etc.) and click **Search** to view your results.
6. If you would like to save this search, including the actual search data, click **Save** and enter a new name (i.e. the address of the property) so you can reference this search in the future.
