

Adding StreetScape Still Photo, Pivot, and Drive-By Views to Listings

StreetScape gives you ability to access a photo library for many properties in the Realcomp coverage area. Included in this functionality is the ability to get an exterior still photo of the front of the property as well as the option to add a drive-by, pivot and panoramic view.

To access the StreetScape images, click the upload icon . Then click the StreetScape icon . See screenshots.

If the house in the photo is not the correct house, drag the green house icon on the aerial photo to the correct location. The green balloon shows which photo/angle is currently being displayed. Click any of the red balloons to view a different angle. Click Next when finished.

1 Select Best View ▶ 2 Create 3D Tour ▶ 3 Capture Still Images ▶ 4 Preview & Save **130 HENNING ST**

Select Best View

Navigate the map below to the property then pan and zoom the Fisheye Viewer to find the best view of the property.

LOOKABOUT Streetscape

Move the icon to the center of the roof.
Select the icon to select between different photos of the property.

Cancel Finish **Next**

Select the starting photo and additional photos to be included in the 3D tours. Follow the instructions on the screen and click Next when finished.

1 Select Best View ▶ 2 Create 3D Tour ▶ 3 Capture Still Images ▶ 4 Preview & Save **130 HENNING ST**

Create 3D Tours

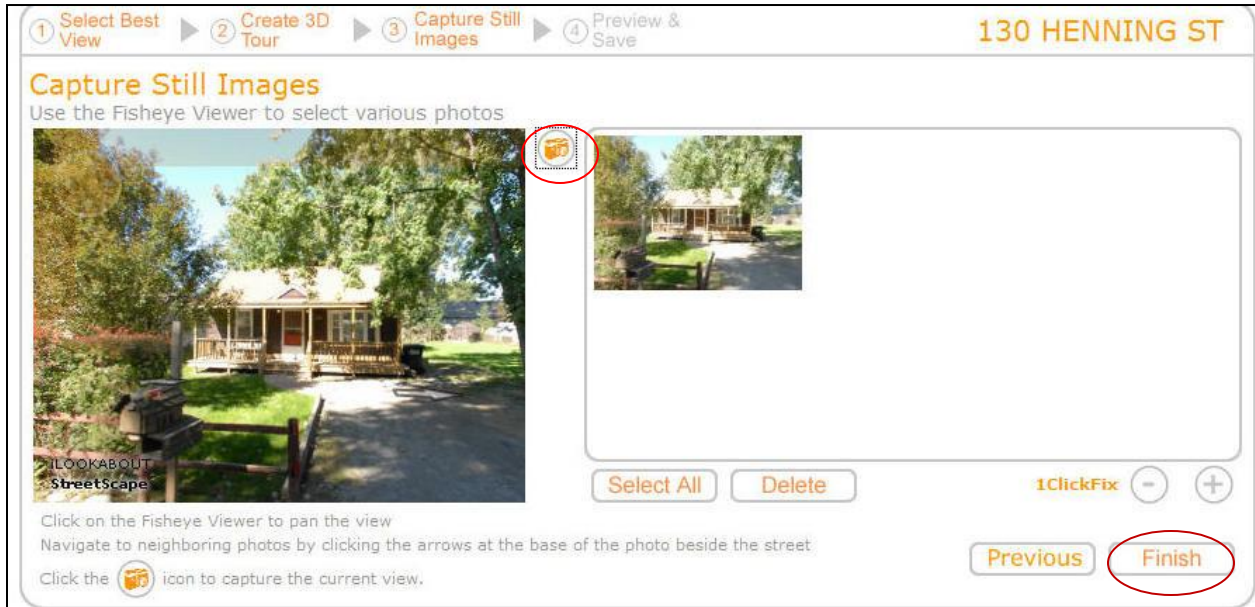

Select the starting photo and additional photos to be included in the 3D Tours.

Click the image on the left and drag horizontally to change the view down the street.
Moving either slider will adjust the start ▲ and end ▲ frames for the 3D Tours.
Moving the frame selector | will change the current frame in the preview area.
The photo which is highlighted will be the default starting photo for the 3D Tours.
Pivot View is a street view tour where the camera is always angled towards the subject house even as you move up and down the street.
Drive By is a street view tour where the camera is always perpendicular to the street, pointing directly at each property as you move up and down the street.

 Drive By - 0 +

Previous Finish **Next**

Follow the instructions on the screen to use the arrows and pan tool to line up your still photo. Click the camera icon to capture the still photo. Click Finish when done to return to the Manage Photos screen.

If you captured a still image, it will be added as your last photo and will be labeled StreetScapelImage. If you wish this to be your primary photo you will need to click and drag it to the first photo position you may also wish to change the default name. The Drive-By, Pivot and Panoramic views can be removed using the white X in the blue box.
