

Sending the Remine App to Clients

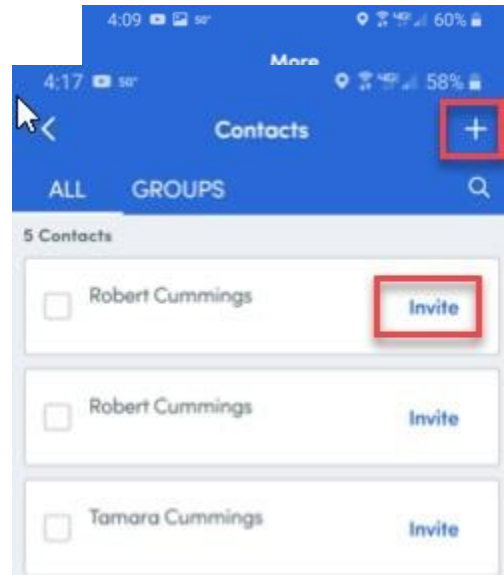

The Remine app is not only helpful for you but can also be the mobile interface that you use to connect with your clients and send them information. They can search for properties, save ones they like and communicate with you. You can also run a preliminary credit check (with their participation).

1. To access your Contacts, click More (the three-dot menu in the lower right of any screen).

2. Select Contacts from the Additional Pages section.

3. If the contact is already in the list, click Invite to the right of their name. If you need to add the Contact, click the plus sign in the upper right of the Contacts page. This gives you the option to “Add Contact to Remine” or “Create Contact Group”.

4. Click Add Contact to Remine and you will be given the option import the contacts from your phone contacts. Once you have given Remine access to your phone’s contacts, you can select the ones that you want to add or click the blue button at the bottom of the screen to Add All Contacts. If you have selected specific contacts, click Done when finished. Once a contact has been added, you can click the Invite link next to their name to invite them to use the Remine app.

If you have any additional questions, please contact Realcomp’s Customer Care at (866) 553-3430.
