REALCOMP II LTD. RECOGNIZED AS ONE OF SOUTHEAST MICHIGAN'S 2007 "COOL PLACES TO WORK"

*Multiple Listing Service Provider Selected From Amongst Hundreds For Company's
Employee Benefits, Events and Workplace "Extras"*

FARMINGTON HILLS, Michigan — Realcomp II Ltd., the state's largest real estate Multiple Listing Service (MLS) provider, with 13,000 plus subscribing REALTORS®, today announced its selection as one of Southeast Michigan's 2007 "Cool Places To Work". Award-winners were recognized by the American Society of Employers, among others.

Realcomp received the honor based on employee nominations and online surveys, which noted, in particular, the company's outstanding benefits, creative and informative employee events via its "Employee Retention Program", as well as fun and innovative workplace extracurricular activities.

More than 215 companies and nonprofits, located in Oakland, Macomb, Livingston, Washtenaw and Wayne Counties, were nominated by their employees. Of those nominated, 127 companies completed online surveys which provided objective measurements on policies, benefits and "talent management" practices. Categories were next weighted according to company size and the importance of particular attributes. From there, 60 "cool" companies were chosen in five divisions, based on company size. Realcomp was recognized in the 1-50 employees category.

"This distinction is particularly special and meaningful as it comes directly from our employees," said Karen Kage, CEO of Realcomp II Ltd. "We have quite a special group here. We all benefit, as a result, as do, importantly, our clients."

Research conducted by the San Francisco-based Great Places to Work Institute, Inc. indicates that great work places, in turn, experience lower job turnover, better job applicants, lower health insurance costs and better customer satisfaction.

Realcomp is headquartered in Farmington Hills, Michigan and has continuously operated as a full-service provider to the real estate industry, offering Multiple Listing Services, real property data, products and training since 1994.
