

Searching the Grouped Appliance Options

With the October 2019 RCO3 updates a new option was added to search the Appliances field that will allow you to search for any type of refrigerator, washer, dryer, etc. even though there are many options for these appliances available.

The grouped appliance options are automatically included in the Residential Detail Search.

To search for ANY refrigerator option, click the checkbox for Refrigerator.

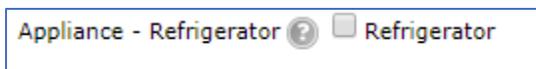

The screenshot shows a search interface with two main sections:

- Appliance Group Searches:** A list of checkboxes for various appliance categories: Dishwasher, Dryer, Freezer, Range/Stove/Oven/Cooktop, **Refrigerator** (highlighted with a red box), and Washer.
- Appliance All Search:** A scrollable list of specific appliance types: Bar Fridge, Cooktop, Cooktop (Electric), Cooktop (Gas), Cooktop (Induction), Cooktop (Propane), Dishwasher, Dishwasher (ENERGY STAR®), Dishwasher (Portable), and Disposal.

Between the sections, there is instructional text: "Use the Appliance Group Searches on the left to return listings with any type of dishwasher, dryer, freezer, refrigerator, washer, or cooking appliance. OR Use the All Appliance Search on the right to return listings with specific types of appliances." At the bottom right, there are radio buttons for "And", "Or", and "Not".

Even though the options do not highlight in the list on the right, your search will return all listings that have any type of refrigerator selected. You can also make selections in the Appliance All Search if you need a specific type of another Appliance, such as an Electric Cooktop.

To search these fields in the Residential Quick Search you will need to add them from Additional Fields and each appliance group field will need to be added separately.

The screenshot shows a search field labeled "Appliance - Refrigerator" with a question mark icon and a checkbox labeled "Refrigerator".

Enter any other desired criteria and run the search to view the listings.
